Logo Overview

Neo's branding is a graphical representation of Neo's vision and identity.

While depicting the first letter of the Neo logo, the Neo doorway also symbolizes Neo's role as the connection to the smart economy. Its colors are carefully chosen to illustrate two important characteristics of the Neo blockchain: young and ever-growing.

Inspired by latest graphic design trends, lowercase letters are used in the logo to deliver a smooth, non-intrusive and consistent user experience.

This modern and contemporary logo is optimized for usage in digital contexts and helps Neo to stand out in a cluttered blockchain marketspace

Logo Lockups

The horizontal lockup shall be used in preference in most circumstances.

The vertical lockup and the Neo doorway symbol shall only be used under space constraints.

Color Version

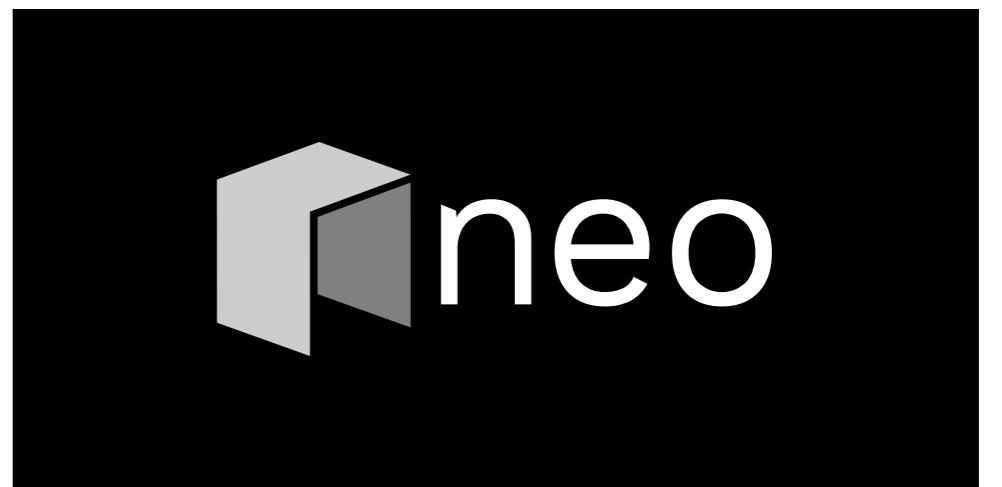

The default logo colors must be used whenever possible. A dark or plain white background is preferred in most circumstances. If the logo must be used against another background color, and default logo colors are difficult to read, then white or black may also be used for the logo.

NEVER DISPLAY THE LOGO IN ANY COLOR OUTSIDE THE COLOR PALETTE (SEE “COLORS” SECTION OF THIS GUIDE).

Mono Version

Both horizontal and vertical logos can also appear in black and white as shown here if only black and white printing is available.

Exclusion Zone and Minimum Size

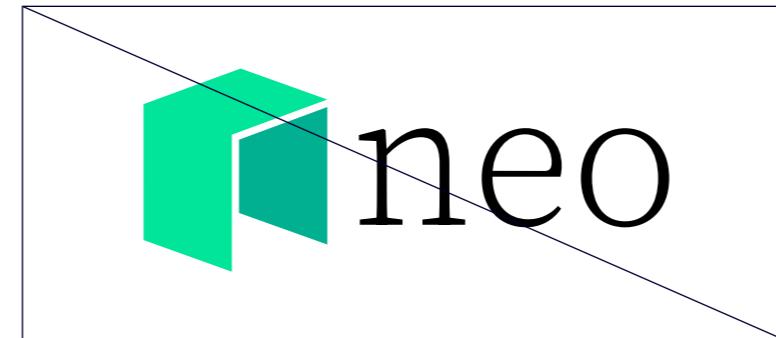

Here are the guidelines for the use of the exclusion zones (clearance space) around the logo, as well as the minimum sizes to be used for horizontal and vertical logos. No graphic element should be placed within the exclusion zones. Minimum sizes have been set according to legibility and clarity.

Incorrect Logo Usage

The NEO brand is a reference point for the people who use it, therefore is important to maintain the original form across all platforms.

Here are some examples of prohibited Neo logo usage.

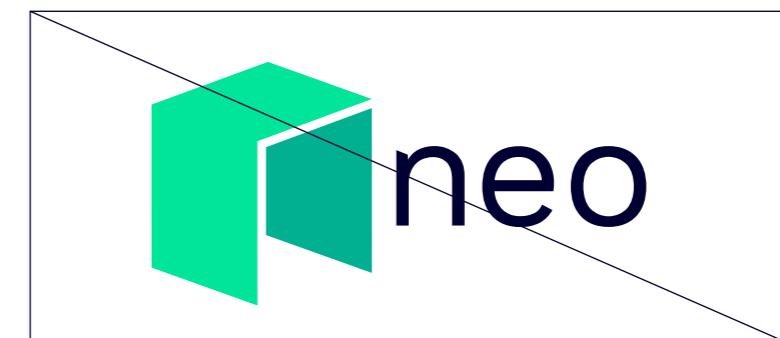

Do not change the typeface

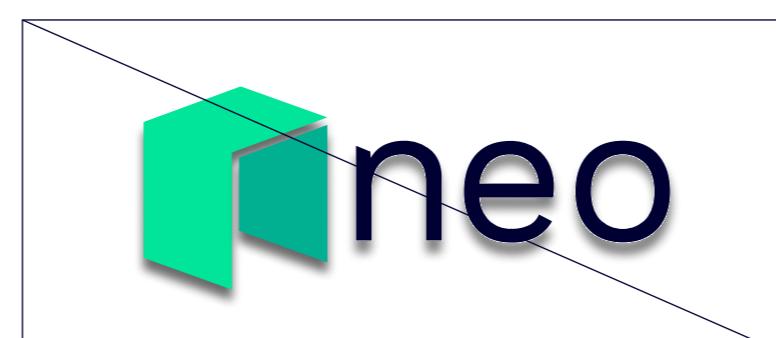

Do not change the color on any part of the logo

Do not distort or skew the logo

Do not alter the proportions of the logo

Do not use drop shadows

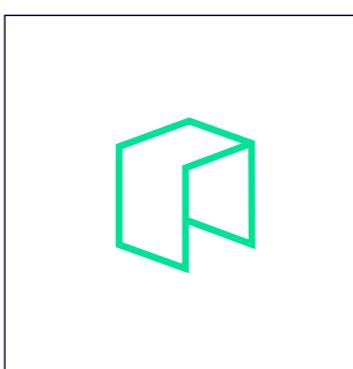

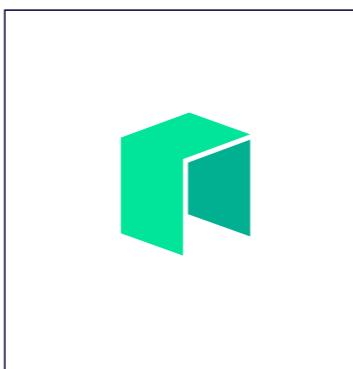

Do not use colour background that 'blend-in' with the logo

NEO & GAS Usage

Uppercases should always be used whenever Neo tokens (NEO & GAS) are mentioned in text.

Neo logo usage guidelines are also applicable when using NEO and GAS logos.

N3 Logo Usage

The N3 logo, whether used next to or separate from the brand, should always follow the format presented here.

Note: It should only be used when the main topic is something related with it.

Combination Logo Usage

Here are some examples of using the Neo logo in organization or product names.

Color Palette

The color palette is essential for building awareness and association with the Neo branding and should be consistently applied across all communications. Always match the colors to the Pantone, CMYK, and RGB color guide specified on this page.

The secondary palette adds flexibility to the palette and range to the system. These colors are recommended to break up large fields of primary colors.

Communication Material

A range of familiar forms such as geometric shapes have been used in different combinations as support for NEO related banners. It's important to maintain and reaffirm this line of work across all Neo channels.

Here are samples for communication materials, with the Neo branding style.

Note: The finer the line weight, the less legible it will be at lower sizes. Therefore, the line weight is not recommended below 3pts.
